SOUTH WETHERSFIELD, CONN.

A Few Reasons why We Can Furnish High Grade Seeds at Low Prices.

1. We are seed growers of long experience. Business established in 1845.
2. We live in a very fertile seed growing section and generally get good crops.
3. We do business in our own buildings on our seed farms.
4. Our business is in the country and we have no heavy city expenses to pay.
5. We deal direct with the planter, saving him extra expense and dealer's profits.
6. We do very little expensive advertising.
7. We do not spend large sums for fancy catalogues but try to make our catalogue plain and right to the point.
8. Our business is the growing and handling of seeds, and we personally oversee the business.
9. Varieties that do not mature well in this section we have grown elsewhere, placing contracts with experienced growers that make specialties of growing varieties wanted, and our long experience has taught us where to place these contracts to get best results.
10. We do a cash business principally, thus saving many losses.

Send in your order and we will endeavor to furnish seeds that will please you.

We will gladly mail catalogues to your friends if you will send us their address.

THOMAS GRISWOLD & CO.

Our office and warehouse is about
six miles south of Hartford near Station 23.
Hartford and Middletown trolley.

We are glad to have parties call
that find it convenient to do so.

A REQUEST

E appreciate the fact that many do not know just what they want in the **SEED LINE** until about planting time, consequently many orders are delayed until late, and then come in a rush, fairly covering us up and it is almost impossible to keep up with the orders; so if our patrons that can, will kindly send in their orders as early as convenient we will greatly appreciate it.

We made the above request last year and we wish to thank our many patrons that complied with same as it helped us greatly to have your orders in early, and we again make this same request.

Although we have extra help in our busy season, it is very difficult to keep pace with orders when the rush is on, so if you will send in your orders as early as convenient you will greatly oblige us.

TERMS.

In order to sell at these prices it is necessary to make our terms cash with order except in special cases where parties are reliable and well known to us we can allow very limited credit with interest added at six per cent.

Outstanding bills are due June 1st.

How to send money.—Remit by Post Office or Express Money Order, Registered Mail or Bank Draft. Postage Stamps may be sent for small amounts. Personal Checks accepted from parties having established credit.

Post Office Money Orders should be made payable at South Wethersfield.

When Seeds are Wanted by Mail, postage must be added at the rate of 8 cents per pound for Seeds, (except flower seeds), 10 cents per quart for Corn and Onion Sets, and 15 cents per quart for Beans and Peas.

Bags, barrels, etc., free of charge. No charge for cartage. Purchasers pay express and freight charges unless otherwise agreed.

Shipping Instructions should accompany each order. If no such instructions are received we will ship by the best and cheapest route known to us.

After shipping in good order our responsibility ceases, claims for damages or miscarriage must be laid on the carriers.

Parties purchasing from us, and wishing references as to our business integrity are respectfully referred to R. G. Dun & Co's, and Bradstreet's Mercantile Agencies, also to our Postmaster, or Town Officers.

As so much depends upon the condition of the weather, soil, etc. when seeds are planted and the care taken in planting them, we sell our goods, in common with other reliable seed houses, subject to the following disclaimer adopted by the American Seed Trade Association.

Disclaimer.—We give no warranty, express or implied as to description, quality, productiveness or any other matter of any seeds, bulbs or plants we send out and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

Field and Ensilage Corn.

Increase your acreage for Field and Ensilage Corn and save large grain bills. The high prices for grains the past few years makes the Eastern farmer realize that he must grow more grain for his own consumption as the West is not likely to be able to supply the East as liberally in the future as in the past. There are thousands of acres of practically waste land here in New England that might be planted to corn and net the owner a neat sum.

THOROUGHBRED LEAMING

We sell large quantities of this Corn and we know that it gives excellent satisfaction. It is a fine variety for ensilage also for general crop where season is long enough for it to mature.

It is a much improved strain of Leaming, ripening about the same time as the old style. Kernels and ears more uniform, better filled out and of much purer type. Stalks are good size with abundance of leaves, and a heavy yielder of large handsome ears. \$0.30 per 4 qts. \$0.50 per peck. \$1.60 per bushel. \$1.50 per bushel for 2 bushels or more.

ALYSSUM

ALYSSUM, Sweet.

A fragrant hardy annual, bearing spikes of small, white flowers in great profusion throughout the summer and autumn. Useful for borders or early bedding. Sow the seed early in spring.

Little Gem, 3 to 4 inches high,
Per ounce, 20 cts.

White Carpet,
Per ounce, 25 cts.

ANTIRRHINUM (Snap Dragon.)

A half-hardy perennial, growing from 6 inches to 2 feet tall. Flowers are oddly shaped and apparently closed, but by pressing the sides together can be made to open like a dog's mouth.

Extra Choice Mixed,
Per ounce, 25 cts.

ASTERS.

A popular half-hardy annual, growing from one to two feet high. The best method of culture is to sow the seed in boxes in late winter and transplant about May 1st. The seed can be sown, however, in rows where the plants are to remain, thinning them 10 to 12 inches apart.

SWEET PEAS.

The Sweet Pea is a climbing annual and hardy. This popular flower is of the easiest culture and well adapted to most any climate. The seed should be sown early in the spring in a drill 4 to 6 inches deep, dropping three or four seeds every four inches and covering about one inch, working the soil around the plant as it comes up

until it is on a level with the surface, this leaves the roots down deep enough not to be affected by dry weather.

Sweet Peas require an abundance of water and an open location. The water should be applied at the roots and the vines should not be sprinkled. A trellis of brush or chicken wire is necessary.
